ARROW is a soft eye pencil which will help enhance the natural beauty of the eyes. The pencil delivers an intense all-day colour.

- intense colour
- soft consistency
- built-in sponge for blending lines

Even if you have sensitive skin around the eyes, you can use ARROW and enjoy perfect makeup. The unique pencil formula cares for the under eye skin. ARROW ingredients have been carefully selected at perfect proportions. Therefore its formula guarantees safety. All that needs to be done is to draw a line, starting from the inner corner of the eye. The eye pencil can also be used on the waterline. To get a smoky eye effect, use the sponge provided to smudge the lines. Depending on the preference, the lines can be either thin or bold.

The product was tested dermatologically and ophthalmologically. No side effects have been found during the tests.
