The mini beautyblender with laser focus! Finally a tool to ensure professional-style contouring, highlighting and concealing which can easily be accomplished by a makeup novice or a makeupnista. Micro.mini is $\frac{1}{4}$ the size of the original beautyblender®, but grows to twice its size when wet, making it the perfect size to maneuver into small areas such as the under eye, inner eye corners, lids, brow bones, sides of the nose, top of the cheeks and acne spots. Insider Tip: Create a quick smoky eye by using micro.mini with your favorite eyeshadow: use the round part of micro.mini to apply a neutral base color all over the lid. Then, use the point to go into the crease and along the lash line with a deeper shade. Blend it all together using the sides of the micro.mini for the perfect sexy, smoky eye.

What else you need to know: Beautyblender features an open cell structure that fills with small amounts of water when wet. This allows the sponge to be "full" so that the makeup product sits on top of the sponge rather than being absorbed, allowing you to use less product every time. When wet, beautyblender nearly doubles in size and becomes even softer, returning to its original size when it air dries. Handcrafted in the USA.

Beautyblender has chosen to use safe, water-soluble dyes that do not harm the environment and will maintain the integrity of their proprietary foam. For this reason, you may notice some color run off or wash away the first time you wet beautyblender. This is normal and will disappear after you have cleansed the product several times.
